Ms. Nina Poss
North East Regional Manager
Hemosure, Inc
5358 Irwindale Ave
Irwindale, CA 91706

Dear Ms. Poss:

We are gracious for the support of the "Screen to Save" (S2S) project. Please allow us to present our satisfaction with the Hemosure colorectal cancer screening kit.

We have conducted colorectal cancer screening in our communities since 2010 and have used screening kits from different companies. This is the first time we used Hemosure product. Most of our participants felt that the kit was easy to use, especially because they did not need to remove a piece of stool and smash it on a card. They found it more pleasant to handle the sample. The compliance rate was high. We were able to achieve a 97% return rate during our last screening event.

We believe that we have found a practical and efficient stool kit for our colorectal cancer screening events in the future.

Sincerely,

Karen E. Kim, MD, MS
